## DESCRIPTION OF THE BUILDINGS

On the ground floor of the farmhouse are the winery, the winemaking and grape processing rooms and a warehouse where the wines rest before being marketed. The winemaking cellar is equipped with all the necessary tools to optimize production such as steel tanks with controlled temperature and wood for excellent aging of red wines.

On the upper floor of the farmhouse we find other rooms to be renovated. There is already a project for the work to create three independent apartments, all consisting of living room with kitchenette, bedroom and bathroom.

The other outbuildings are currently used as storage but could be useful to complement the farmhouse or as a farm store.
